

PIERRE MENDES SALATIEL

Backend / Full-Stack Software Engineer | PHP, Laravel, Node.js | MySQL, PostgreSQL, MongoDB | REST APIs, Microservices

Uberaba, Minas Gerais, Brazil • +55 (34) 9 9140-3055 • pierretielmendes@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Mid-level Software Engineer with over 4 years of experience in backend and full-stack development, specialized in PHP (Laravel, SlimPHP) and scalable architectures for high-complexity, high-transaction-volume systems. Experience across payment platforms, corporate CRM, WMS, and internal process automation, with strong command of relational and non-relational databases (MySQL, PostgreSQL, MongoDB), REST APIs, microservices, containerization (Docker), and observability (Datadog, OpenSearch). Combines solid technical delivery with communication and mentoring skills, backed by complementary experience teaching database systems and software engineering at the university level.

TECHNICAL SKILLS

Languages (Programming): PHP (7/8), JavaScript, TypeScript, SQL, Java

Architecture & Patterns: MVC, Three-Tier Architecture, REST APIs, Microservices, Hexagonal/Clean Architecture

Frameworks & Runtime: Laravel, SlimPHP, Vue.js, TypeScript, Node.js (working knowledge), React Native

Databases: MySQL, PostgreSQL, MongoDB — data modeling, transactions, and SQL query optimization

Observability & Search: Datadog (dashboards, alerts, APM), OpenSearch (querying and indexing)

Agile Methodologies: Scrum, Kanban, functional and non-functional requirements analysis, UX principles

DevOps & Tools: Docker, Docker-Compose, Git/GitHub, Azure DevOps (CI/CD), Kafka, Redis, Heroku, Unix/Bash

Data Integration: ETL with Pentaho Data Integration (PDI)

Spoken Languages: Portuguese (native), English (intermediate), Spanish (basic/intermediate)

PROFESSIONAL EXPERIENCE

Backend Developer, Mid-Level III | EBANX (via Objective, outsourcing)

Curitiba, PR, Brazil — Remote • May 2025 – Present

- Work on the Platform team (Dev Internal Solutions) of the internal EBMNG platform, responsible for automations across the merchant lifecycle within a microservices architecture.
- Developed an onboarding automation suite with standardized defaults via YAML, automatic anti-fraud configuration, and cross-country data synchronization, including multi-tenant support.
- Built a bulk configuration endpoint with access control and transaction auditing, following MVC patterns and layered architecture best practices.
- Led the refactoring of the Tax Platform, migrating to a clean/hexagonal architecture (Resolvers, Services, UseCases, DTOs), with full CRUD coverage and automated test coverage.
- Integrated an international acquirer (Cardnet, Dominican Republic) end-to-end — charges, partial refunds, and observability — and supported payment integrations across LATAM.
- Work in agile cycles (Scrum/Kanban) with cross-functional teams, participating in requirements gathering, demand definition, and rollout support in an international environment (daily technical English).
- Use CI/CD tooling (Azure DevOps) integrated with Git for build and deployment automation, plus Docker containerization.
- Monitor and observe automations (user/group sync, retries, error handling) via Datadog — dashboards, alerts, and APM — and use OpenSearch for log/event querying and indexing.

Full-Stack Developer | Zallpy Digital | Unicred Client (Outsourcing)

Rio Grande do Sul, Brazil — Remote • Nov 2022 – May 2025

- Developed and maintained backend and frontend features (PHP and Vue.js) on the CRM Realiza platform, a high-traffic corporate system, following MVC architecture.
- Implemented REST APIs and system integrations, directly participating in deployment cycles, application debugging and profiling, troubleshooting, and production support.
- Performed relational data modeling and transactions, and built ETL processes (Pentaho/PDI) for data integration and transformation across corporate systems.

- Collaborated in an agile environment (Kanban) with Azure DevOps for demand management, code versioning, and CI/CD automation.

PHP Developer | e-Ship WMS

Curitiba, PR, Brazil — Remote • Jun 2022 – Nov 2022

- Developed new features and performed evolutionary maintenance of a WMS (Warehouse Management System) platform using object-oriented PHP.
- Implemented system integrations via REST APIs and web services, and resolved technical support tickets under SLA in a production environment.

IT Assistant | Full-Stack Developer | Valmont Industries, Inc.

Uberaba, MG, Brazil • Dec 2020 – Jun 2022

- Led the technical development of the Valley Check Pivot project, digitizing after-sales field processes previously managed via spreadsheets, and structuring a versioned development workflow (Git).
- Full-stack development with PHP, Laravel, JavaScript, Vue.js, and Bootstrap, including maintenance of the global Valley Scheduling platform.

OTHER ACTIVITIES — TEACHING

University Lecturer | UniFACTHUS – University Center

Uberaba, MG, Brazil • Aug 2025 – Present

- Teaches Data Structures, Databases (Fundamentals and Administration), and Agile Methodologies, with a focus on SQL query performance and data modeling.
- Builds technical communication and mentoring skills applied to training new developers, connecting academic content to real market scenarios.

EDUCATION

Graduate Certificate — Software Engineering

Faculdade Metropolitana (FAMEESP) — São Paulo, SP, Brazil (distance learning) | Feb 2024 – Feb 2025

Bachelor's Degree in Information Systems

Faculdade de Talentos Humanos (FACTHUS) — Uberaba, MG, Brazil | 2020 – Jan 2024

Technical Degree in Graphic Computing

Instituto Federal do Triângulo Mineiro (IFTM) — Uberaba, MG, Brazil | 2017 – 2019

ADDITIONAL CERTIFICATIONS

- Authentic Communication with Multigenerational Teams
- How to Present Your Ideas Strategically
- Bill George on Self-Awareness, Authenticity, and Leadership
- Conflict Resolution for Beginners
- Strategies to Improve Self-Awareness
